CAREER OBJECTIVE

As a recent graduate, I am eager to leverage my skills in both front-end and back-end development to implement scalable applications. With a lifelong passion for technology and computers, I have a strong foundation in web development technologies. I graduated from Southern New Hampshire University, where I developed a solid understanding of front-end and back-end technologies, focusing on the MERN stack, data structures, API development and integration, responsive design, testing/debugging, and software development methodologies. I am motivated to take my first significant step into the world of software development/web development.

Education

Southern New Hampshire University
Manchester, NH

Full-Stack Developer Certificate
May 24

Programming Skills

Developed dynamic web-based applications that efficiently gather and process user input, implement logic, manage date-related functionalities, and offer intuitive visualizations.
